

# THE PANEL

## EASY TO MOVE

ALGAFLEX® Movable Wall panels can be manually moved without much effort, thanks to an exclusive guiding system that removes any effort in motion. Just 1/3 of a key turn to lock or unlock top and bottom telescopic seals simultaneously or engages the motorized locking system (see our range pages 10 to 33).

The telescopic seals also allow the soundproofing and mechanical locking without any track on the floor.

## TECHNICITY AND AESTHETICS

ALGAFLEX movable walls offer under tracks heights of up to 12m and are compliant with all acoustic insulation and fire resistance requirements, ALGAFLEX® movable walls are as stylish as they are effective.

We offer a wide range of standard surface finishes, from melamine and laminate to other options, subject to technical feasibility: natural wood veneer, lacquered faces, mirrors, lacquered or perforated sheeting, etc... Aluminum profiles are available with natural anodizing as a standard feature, and in all anodized colors or RAL thermo-lacquers for special orders.
