

SERIFLEX 45®

Effective and stylish, SERIFLEX meets all Movable Wall requirements within a controlled budget, ideal for restaurant dining rooms, play areas and quiet rooms in daycares and nursery schools, cafeterias...

PRINCIPLE

Custom-made acoustic movable wall system. Sliding panels in a top track without any floor guidance.

ACOUSTIC

The SERIFLEX 45® offers an acoustic reduction R_w of 45 dB.

SILENT AND EASY TO MOVE

ALGAFLEX® assures an exclusive system: Polymer-coated, self-lubricating, wear-resistant ball bearing trolleys (Delrin).

TECHNICAL RELIABILITY

Our SERIFLEX 45® walls have undergone the most rigorous endurance and mechanical resistance tests, in a specific lab or in ALGAFLEX's own Test Center. 5-year parts and labor warranty.

IMPLEMENTATION

Panels can be fixed by a central suspension (MONODIRECTIONAL) composed of 4 self-lubricating and highly resistant polymer rollers ensuring a smooth and silent movement without friction.

Panels can also be fixed by 2 trolleys (MULTIDIRECTIONAL) with self-lubricating polymer rollers with double direction of rotation ensuring smooth and silent movement without friction.

For mono panels greater than 4 500mm ask for technical advice, please consult us for study.

QUICK TO INSTALL

Top and bottom telescopic seals are locked in place with just 1/3 of a turn of a removable handle.

FACE FINISHING

- Range Melamine Laminate ALGAFLEX
- Range Laminate PRINT colours
- Oberflex ALGAFLEX
- Laminate all brands.

OPTIONS

- Laquering profil
- Oculus.

JONING PANELS

| | |
|--|------------------------------------|
|  Panel Maximum Width | Custom made according to finishing |
|  Weight starting from * | 44 Kg /m ² |
|  Panel Maximum Height | 6 000 mm |
|  Acoustic Reduction | R_w 45 dB / R_a 43 dB |
|  Thickness | 100 mm |
|  Fire Reaction | Meets standard AM14 |

* Weight for panels of 3000 x 1200 mm

* Depending on the specificities of the project, our design office will adapt the measurements.
