

AUTOMATIC LOCKING MURAUTO

The operation of the high and low removable handle is carried out by an electric motor which allows the instantaneous locking or unlocking of the panels constituting the Movable Wall. This system can be integrate to our Movable Walls **STYLIST**, **SILENCE**, **HYBRID SILENCE** and **LUMIERE**...

It replaces the manual locking and unlocking of the panels.

Battery backup in case of power failure and mechanical unlocking possible

OPTION CURVED WALL

Pushing back technical limits, the **CURVED WALL** is the natural choice of Movable Wall for all of whom creativity has no bounds.

An unrivalled innovation for use in congress halls, reception rooms, amphitheaters...

A unique design that is simply beautiful.

	Sound Reduction	Rw 50 dB / Ra 46
